

For sealing tested full-face masks, lung-governed demand valves or SCBAs

Sealer, complete with accessories (tubular film and film unroller)

After cleaning, disinfecting, drying and testing, full-face masks as well as lung-governed demand valves, and possibly even complete SCBAs, that are ready for use should be sealed in tubular film before being put into storage so as to protect them from contaminants and moisture.

We offer tubular films and sealers in different sizes for this purpose.

Available sealers

- ❖ Sealer MA plus **330-320**
 max. film width: 420 mm
 automatic sealing without preheating
 adjustable sealing time
 seal width: 3 mm
 sealing arm with film cutter
 foot-pedal operated
 power consumption: 500 W
- ❖ Sealer PA plus **330-321**
 max. film width: 620 mm
 automatic sealing without preheating
 adjustable sealing time
 seal width: 3 mm
 sealing arm with film cutter
 foot-pedal operated
 power consumption: 550 W

Tubular PE films

- ❖ 250 mm x 700 m **330-322**
- ❖ 300 mm x 700 m **330-480**
- ❖ 350 mm x 700 m **330-351**
- ❖ 500 mm x 390 m **330-323**

Film unrollers

- ❖ maximum film width 420 mm **330-324**
- ❖ maximum film width 620 mm **330-325**
